

PODTEST.IN

Learning Platform for Aspiring SDET's

Table of Content:

- SDET Program Overview & Features[Page 3]
- Who can Enroll?[Page 4]
- High Level Syllabus [Page 5]
- Course Instructor details & experience [Page 6 -7]
- Detailed Syllabus of all 20 modules page-wise [Page 8 -27]
- Recommended SDET Learning Schedule [Page 28]
- Recommended DSA Learning Schedule [Page 29]
- Video Recording list per topic [Page 30- 44]
- Registration process [Page 45]
- Pricing & payment details [Page 46]

SDET Program

- Welcome to world's most in-depth & most affordable Recorded 'SDET' Program.
- This program is a **subset** of our **Original 'Full-Stack' Bootcamp**, which is currently running live & 'Registration is Closed' now for that program.
- We wanted to extend the benefits of that program to everyone who wish to upskill themselves in the SDET field.
- What you will get as part of this Program:
 - Recorded 20 Modules
 - Framework Design: Product Companies standard Framework creation from scratch covered.
 - Recordings of these modules are provided [For 3 Years]
 - Access to GitHub Repositories for all the modules
 - Access to Discord Community [can ask your queries & doubts here & learn from other peers]
 - Live Doubt Session of 2 hours on Every Alternate Saturday for 6 months

Who can Enroll?

- Since every module is covered from scratch.
- Suited for people with below needs:
 - Switching Career to Software Testing
 - Freshers/Intern
 - People in Manual Testing, wanting to switch to Automation Testing
 - Automation Engineers looking to become Full-Stack
 - People with career gap

High Level Syllabus

- Languages covered: Java
- Web Automation tools covered: Selenium[Java]
- Web Technologies: HTML, CSS, HTML-DOM, XPath, CSS-Selector
- Framework Design: Learn Industry standard framework using 5 Different Design patterns
- CI/CD: Git, GitHub, Jenkins,
- Build Tool: Maven
- Cloud Infrastructure: AWS
- Containerization: Docker
- Reporting: TestNG, Cucumber, Allure
- DSA: Big-O Notations, Design Patterns, Solving Patterns, Design Principles, Searching Algo, Sorting Algorithms, UML, SQL, LLD, HLD Designs, Top Interview Coding Questions

*Detailed Syllabus for individual module mentioned in respective slides, do check out the coverage.

About Our Mentor

- [Akhil Jain](#) will be the course instructor for this bootcamp.
- IIM Lucknow Alumni, CFA Level 1, AWS Cloud Practitioner certified, ISTQB certified.
- He has 13+ years of working experience as Automation Engineer.
- Worked on Java & JavaScript based tech-stack to build frameworks from scratch.
- Worked on Web, Mobile, API, Performance, Database, System Testing.
- Currently working on System automation testing which involves automating Installation, Upgrade , Backup/Restore for telecom systems using Linux shell scripting, Docker, AWS, EKS, GRE, Kubernetes, Jenkins.
- Have skillset on Java, JavaScript, Selenium, Webdriver.io, Cypress, Playwright, Postman, RestAssured, Appium, Jmeter, Jenkins, Linux, AWS, etc..
- Have taught more than 2000+ aspiring SDET's. [Check the next slide to know about the platforms on which he is currently teaching]
- [LinkedIn Profile](#): <https://www.linkedin.com/in/akhil-jain-podtest/>

Teaching on Platforms

- **GeeksforGeeks:** 'Java with Selenium' Bootcamp
 - Bootcamp link: Currently running the fifth batch SDET5.
<https://www.geeksforgeeks.org/courses/complete-guide-to-software-testing-automation>
- **TheTestTribe:** Recorded course of 30+ hours on Java, Selenium, Maven, TestNG, Git, Framework Design, Jenkins CI/CD.
 - Already 1000+ students enrolled in the program.
 - Course link: <https://www.thetesttribe.com/courses/selenium-course/>
 - Completed 2 Live Bootcamp:
<https://www.thetesttribe.com/live-trainings/automation-bootcamp-selenium-java/>
- **Corporate trainer:** Conducted Trainings for multiple MNC's.
- **YouTube channel:** Regular uploads of Automation testing related videos.
 - <https://www.youtube.com/@namastetest> [Do Subscribe us for latest updates]
- **Podtest.in:** Running 12 months Live 'FullStack SDET Bootcamp' [End Date: 1 Mar 25]
- Ran Automation Architecture Bootcamp [2000+ Registrations, lectures available for free on YouTube Channel]

JAVA

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Installation
- JDK, JRE, JVM
- Data types: Primitive , Non-Primitives
- Scoping: Local, Instance, Static
- Operations: Arithmetic, Logical, Relational
- Conditional logics: If-Else, For, while, Switch
- Classes, Objects, This keyword, Constructors, Methods
- Interfaces & Abstract Classes
- OOPS: Abstraction, Encapsulation, Inheritance, polymorphism[Overloading, overriding]
- Access Modifiers: Default, Private, Public, protected
- Arrays & its operations
- String & its methods
- Exception Handling: Try-catch-finally, throws. Checked vs unchecked exceptions.
- Collections Framework: Set, Map, List, Arrays, Collections
- Comparable, Comparators, Hash Code, Equality etc.
- Working with File systems
- Working with Streams, Date Time
- Working on Threading

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

SELENIUM

♥ Register using our website:
👉 <https://podtest.in> 🚀

- Installation
- Architecture understanding
- Selenium Grid
- WebDriver Browser commands & its capabilities.
- Elements related commands, working with different elements & Action Class
- Wait Mechanisms
- Handle Iframes, Popups, Windows, Tabs
- Shadow DOMs, File uploads, JavaScript executor, Screenshot capturing, WebTables related operations

♥ Akhil Jain | support@podtest.in | <https://podtest.in> 🚀

MAVEN

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Installation
- Maven Hierarchy: Lifecycle -> Phases -> Plugins -> Goals
- Understanding Lifecycle: Clean, Build
- Different configuration files: pom.xml, settings.xml
- Different types of Repositories
- How Maven works
- Adding dependencies
- Adding Plugins configuration
- Profiling
- Need of Target folder
- Maven CLI
- Adding custom properties
- Running testcases via Maven
- Surefire report plugin

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

TestNG

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Installation
- Need of TestNG, Understanding Testing process
- TestNG.xml file
- Hierarchy understanding: Suite -> Test -> Groups -> Class -> Methods
- Create testcase using @test annotation
- Using Before & After Hooks for each level.
- Test Data Management using Data Provider
- Parameterization
- Parallel Execution
- Cross-Browser Testing
- Generating Execution reports
- Adding custom listeners.
- Attaching logs, screenshots, exceptions to the report

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

SQL

♥ Register using our website:
👉 <https://podtest.in> 🚀

- What is SQL & learn the structure of it.
- Select, from, where, distinct
- Different types of joins: Inner Join, Left, Right, Outer
- Grouping, having clause
- Insert, update delete queries
- Learn to write Sub-queries
- Setting up JDBC connection to run SQL scripts via automation scripts
- Database testing using SQL

♥ Akhil Jain | support@podtest.in | <https://podtest.in> 🚀

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Installation
- File lifecycle in Git, different stages involved.
- Important files in Git: .gitignore, readme.md
- Create a Git Repository
- Cloning a project
- Forking a project
- Working with branches : creation, switching, etc.
- Updating a branch with latest changes
- Pushing local changes to remote
- Merge branches & resolve merge conflicts.
- Git commands: init, clone, remote, branch, checkout, add, commit, push, pull, log, merge

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Account Creation
- Creating a Repository.
- Types of repositories: Private/ Public
- Controlling the access to the users
- Creating branching strategies.
- Defining the rules for merging the branches
- Review commit changes & approval process
- Sharing review comments & incorporating the comments.

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

Design Patterns

♥ Register using our website:
👉 <https://podtest.in> 🚀

Covered Below Patterns:

- Singleton
- Factory Method
- Abstract Factory
- Builder
- Page Object Model

♥ Akhil Jain | support@podtest.in | <https://podtest.in> 🚀

Linux

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Installation of Linux OS via Virtual Box.
- Linux: History, versions & different flavours & comparison with Windows machine
- Understanding Linux file system
- Working with file management system
- Files & Directory CRUD: chmod, touch, rm, cat , less, more, head, tail, mv, copy
- Working on data: grep, pipe
- Work with vi Editor
- Switch users & sudo access
- Shell scripting basics: variable creation, if-else, for loop, methods
- Connecting to linux via CLI using ssh command
- Copy content from one machine to another using scp.
- Linux repositories & how to install softwares on Linux.

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

Docker

♥ Register using our website:
👉 <https://podtest.in> 🚀

- Installation
- Using Docker Images.
- Creating containers from images & setting up connection between multiple containers
- Volume mapping of docker with underlying OS.
- Using Docker as agent machine in Jenkins pipeline
- Running your Automation framework inside Docker container via Selenium & installing browser inside it to perform the execution.

♥ Akhil Jain | support@podtest.in | <https://podtest.in> 🚀

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Account Creation
- Using AWS Free tier
- Connecting to AWS via UI, CLI.
- EC2: Creating a EC2, what is base image, how to connect to EC2 via UI & CLI
- Use EC2 as a Agent machine to run Jenkins pipeline.
- S3 bucket: how to create S3 bucket & add objects to it via CLI & UI.
- How to host your Allure Report using S3 bucket & share with stakeholders

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

Jenkins

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Installation
- Agent Machines & Configurations understanding.
- Creating Free Style Jobs
- Creating pipelines
- On-demand & Scheduling based execution
- Dynamic scripting samples
- Create CI/CD pipeline for Automation framework execution using Jenkins, Github, Docker, AWS.
- Attaching
- Creating branching strategies.
- Defining the rules for merging the branches
- Review commit changes & approval process
- Sharing review comments & incorporating the comments.

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

DSA

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Recursion, Slicing Window, Frequency Counter, LIFO, FIFO
- Search Algorithms: Linear, Binary search
- Sorting Algorithm: Bubble, Selection, Insertion, Merge Sort
- Data Structures: Stack, Queue, Singly Linked List, Doubly Linked List, Binary Search Tree.
- Languages covered for DSA: Java & JavaScript

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

- Installation
- Implement Allure Report in the framework.
- Attach screenshots to the report
- Attach the test case logs to the report
- Generate execution report.
- Attach report with CI/CD pipeline
- Share the report with stakeholders [Implementing AWS S3 bucket usage]

Framework utilities

- Data Driven testing via reading data from Excel sheets
- Implementing logging framework like log4j2
- Configuring properties files
- Creating custom execution reports
- Using POM pattern to design framework.
- CI/CD integration using Jenkins, GitHub, maven
- Cross Browser & Parallel Execution capabilities.

Cucumber

♥ Register using our website:
👉 <https://podtest.in> 🚀

- What is BDD?
- Gherkin Syntax: Feature, Scenario, Scenario-outline, examples, Given, When, Then, And, But, Datatable, Tags
- Creating feature file, Step definition files & Runner files
- Integrating Cucumber with TestNG
- Cucumber Hooks: Global, Conditional, Scenario, Step
- Running testcases based on tags i.e. grouping, Tag Inheritance
- Generating Cucumber execution reports
- Attaching cucumber reports in Jenkins

♥ Akhil Jain | support@podtest.in | <https://podtest.in> 🚀

HTML

♥ Register using our website:
👉 <https://podtest.in> 🚀

- What is HTML?
- How HTML works?
- Why as Automation Engineer, we should know about HTML
- Tags understanding: Input, div, span, button, body, head, html, p , h1, a, img, script, iframe, svg, shadow, list, webtable etc.
- Attributes understanding & how to read them.

♥ Akhil Jain | support@podtest.in | <https://podtest.in> 🚀

CSS

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- Need of CSS
- How Styling gets applied on a web page using CSS?
- Stylesheets & inline css
- Learn writing CSS Path: Id, classname, attributes, descendants, immediate childs, Indexing, partial attributes, prefix, suffix, immediate siblings, following-siblings, ignore cases, multiple attributes, grouping.

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

DOM

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- What is Document Object Model?
- How it works & why it is important for Automation engineers to know about it?
- How HTML gets converted to DOM structure?
- Document object
- Using DOM methods to write Javascript code to perform operations on UI Automation
- Understanding nodes & its relationship with other nodes.
- DOM Methods: queryselector, getElementById, etc...
- Use Browser console to learn working with DOM

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

XPath

♥ [Register using our website:](https://podtest.in)
👉 <https://podtest.in> 🚀

- What is Xpath?
- Types of Xpath: Absolute & Relative
- Learn using attributes: id, name, class etc..
- Working with text()
- Methods covered: contains, starts-with, normalize-space
- Grouping & indexing
- Axes methods: following, ancestor, child, preceding, following-sibling, parent, self, descendant

♥ **Akhil Jain** | support@podtest.in | <https://podtest.in> 🚀

SDET Learning Schedule

We Recommend you to learn the modules in below Sequence:

1. Git
2. Github
3. Java
4. HTML, CSS, Xpath, DOM,
5. Selenium
6. TestNG
7. Maven
8. Framework Design
9. Allure
10. Cucumber
11. Jenkins - CI/CD
12. Linux
13. Docker
14. AWS

* **DSA Module**: You should start DSA Module after completing Java & run it parallelly with other remaining modules.

DSA Learning Schedule

We Recommend you to learn the modules in below Sequence:

1. Big-O Notation
2. Solving Patterns
3. Searching & Sorting Algorithms
4. Data Structures
5. Design Principles
6. Design Patterns
7. Solve Programming Questions
8. UML
9. SQL
10. LLD
11. HLD

Modules (In-Progress)

- Cucumber
- Linux
- Jenkins
- Docker
- AWS
- DSA

* Recordings for above mentioned modules will get available after 1 October 2024.

** DSA Module: Some videos are already available & provided, remaining topics video will be provided as they become available.[Complete set of videos should get available before 31st December 2024]

Registration Process

- Visit website <https://podtest.in>
- Click on '**Register**' Button for '**SDET Program**'.
- Google form will open up, fill up the asked details.
- Once registered, we will contact you personally in 24 hours on your provided contact details.
- We are offering 2 day trial period where you will get access to the complete module video for your reference.
This can help you to make an informed decision.
- We encourage everyone to compare our course syllabus, duration, topics, projects, pricing, access to recorded courses with any other vendor. Once you are satisfied only then enrol.

Pricing

♥ Register using our website:
👉 <https://podtest.in> 🚀

- We have tried our best to make this program the most affordable in the entire industry considering the **duration, depth of topics, access to recorded lectures, Real time projects** & our expenditures.
- **Our Price is (Rs 4,999/-)**
- Consider this as a Investment for your career growth.
- This may open up new opportunities in form of Salary Hike, Job Switch, Promotions.
- Other Vendors are charging around **Rs 1,00,000** for half the curriculum we are covering & we encourage you to do your due diligence & compare our course, offerings , benefits & cost with the similar course provided by our vendors & once Satisfied, only then enrol.
- Make a informed & a wise decision. [Looking forward to have you in the course]
- In case of queries, please reach out on LinkedIn or through our email address
